

LG Powercomm use NUUO IP surveillance System to secure branch offices nationwide

NUUO solution gives LG Powercomm the capability to monitor branch office activities and guarantee employee safety

Mission

With a capital of \$750 billion KRW, LG Powercomm in Seoul, Korea, is one of the leading companies in optical cable and cable TV transmission network business.

The company greatly contributed to the establishment of the national High-speed communication network using an optical cable of the highest quality.

In order to service the massive end-user level of clients all over the country, LG Powercom had established hundreds of branch offices to fulfill the business demand.

To ensure a quality service is delivered in all branch offices and also to ensure the safety of all properties of all branch offices, a flexible, reliable, and easy to maintain surveillance system is urgently required.

"We think NUUO product has a high quality and best software for vivotek cameras"
Stan, Project Manager, POSDATA Co.,Ltd

Solution

NUUO Partner POSDATA Co.,Ltd, an IT service provider established in 1989 by Korean Steel giant POSCO, recommended to LG Powercom to construct a monitoring system using the NUUO IP surveillance system with Vivotek camera.

The whole implementation takes place with 30 set of NUUO IP-64 surveillance system. With a project of nearly 2000 IP cameras, the first installation was to adapt 356 cameras in many branch offices of LG Powercom. With LG Powercom core business in high-speed data transmission, a dedicated Gigabit network was utilized for video and audio transportation.

Result

The system fulfills the requirement of all perspectives.

On the security perspective, NUUO IP surveillance system was monitoring and recording all activities going on during the office hours and after the office hours. On the monitoring perspective, management can easily using NUUO Remote Live-Viewer to access different cameras from different branch offices in a single monitoring system. Also, management can also perform the same monitoring access via IE at any location where Internet Access is available.

Management also sees an overall cost-saving in both communication and expense.

Requirement and Expectation Fulfilled

LG Powercom is one of the largest telecommunication service provider with a excellent reputation and awareness that needed to equipped with a advanced monitoring and surveillance system.

Such advance monitoring system was considered as a key element of communication process in the cooperation operation.

Multiple side monitoring in a single system at a remote site is certainly a must for the cooperate management.

The new system has proven itself by fulfilling such requirement and expectation.

Furthermore, the new system also anticipate in other effective ways.

The implementation of new NUUO IP surveillance system will be a standard constructing item for all newly established branch offices for LG Powercom.
