

# NUUO VMS Offers 360-Degree Capabilities with ImmerVision *Enables*®

ImmerVision *Enables*® 360° panomorph lens support

From CCTV to IP cameras, from PC-based to Linux-embedded servers, from private to public areas, NUUO's full product line, Crystal Family and Mainconsole Family, provides comprehensive total solutions to customers. Because video surveillance plays an important role in security industry, NUUO has been devoting itself to provide the best video management software (VMS). With certification as ImmerVision *Enables*®, the most flexible and advanced 360-degree viewing standard on the market, the best video management solution becomes possible.

Both NUUO's Crystal Family and Mainconsole Family offer support for ImmerVision *Enables*® 360° panomorph lenses, so you can mount a panomorph lens on select cameras to get full 360x180 degree hemispherical coverage without any image cropping or blind spots, but also for a growing number of 360° panomorph mini domes certified ImmerVision *Enables*® from various camera manufacturers.

And since NUUO is committed to providing an open platform by integrating over 76 leading brands of IP cameras, you can have much more choice in selecting 360° panomorph cameras based on your needs. Crystal and Mainconsole Family video solutions offer enhanced ImmerVision *Enables*® navigation function that let you easily track, detect and analyze the entire panomorph area in live or playback mode, improving your reaction time and investigations.

Moreover, you can enjoy NUUO's Smart Guard, and other sophisticated functions such as centralized E-map, alarm management, access control, etc. Choosing NUUO with ImmerVision *Enables*® lets you experience an easy and value-added video management software with advanced functionality and immersive panomorph views.
