NUUO ®

NUUO version 3.5.0

NUUO MainConsole v3.5.0
Metadata Application Main Features
• Support for all NUUO NVR/DVR/NVDR system • Up to 64 POS, LPR, Access control system • Transaction data overlay on multi-channels • Recording transaction data • Smart detect and Immediate reaction of pre-defined special keyword of abnormal transaction • External rule of user defined event – develop with POS, LPR, Access control alarm SDK • POS, LPR, Access control Event Log search for pre-defined event • Search for specific keyword and playback recorded video with transaction data • SQLite format Database of transaction data
Specifications

• **Live Transaction Overlay**
    ■ Up to 64 POS or Cash Register
    ■ Overlay display of transactions on multiple associated cameras
    ■ User-defined POS OSD setting
    ■ Flexible user-defined overlay areas of different associated cameras
 	
• **Live Transaction Overlay**
    ■ Up to 64 POS, LPR or Access control
    ■ Overlay display of transactions on multiple associated cameras
    ■ User-defined data OSD setting
    ■ Flexible user-defined overlay areas of different associated cameras
    ■ User-defined transaction display time
• **3rd Party Transaction Filed Filter**
    ■ User-defined tag filter
    ■ Export/Import tag filter to/from the other NUUO system

- Six pre-defined tags

1. Omit: Omit unimportant text
2. Substitute: Define text to be replaced
3. Add New Line: Define text as a newline
4. Start: Define the text as a transaction start
5. End: Define the text as a transaction end
6. Cash Register Opened: Define the text as opening a cash register

- Unlimited user-defined filters

- **Smart Detection**
  - Smart detection of 4 event log

  1. Transaction Start: Detect any transaction beginning defined in filter
  2. Transaction End: Detect any transaction ending defined in filter
  3. Open Cash Register: Detect any cash register opening defined in filter
  4. User Defined Condition: Detect up to 10 conditions of special words or numbers which are defined by user for transaction data of each 3rd party device.
  5. Connection Lost: The basic function to alarm when network of 3rd party device disconnecting.

  - Immediate reaction for 3rd party event detection:

  1. On Screen Display
  2. Play Sound
  3. Send E-mail
  4. Phone Call
  5. PTZ Preset Go
  6. Signal Digital Output
  7. Send a SMS message
  8. Upload to FTP
  9. Popup E-Map

- **Recording & Playback**
  - Start recording video when event log detected
  - Basic search of smart detect event log to view recording video of associated camera or export to excel for statistic
  - Advanced search for any text in transaction data and search result overlay
  - Video backup with transaction data
  - Dedicated storage for data that is not deleted in recycling
- **Remote Access**
  - Remote live view camera video with overlay transaction data
  - Remote search transaction data, event log, and overlay on recording video
  - Remote backup transaction data
- **Other**
  - E-Map
  - Store all transaction data in SQLite format for retroactive analysis
  - Support all NUUO NVR/DVR/NVDR system to extend 3rd party device to surveillance solutions
